

ADDENDUM #1

RFP FOR CCTV SERVICE (#HSA1011SER09)

1. Is the location for the client workstation been identified? If so where?
 - ***No, assume the workstation will be in close proximity to the server.***
2. With regards to housing the server, it is assumed that this server will be housed in the hospitals Server room. Will rack space be available to install this server in this room?
 - ***Assume the server will be installed in the IT Server Room on the 2nd Floor in the Administration office. Assume there is sufficient room in the rack and you will not have to provide a rack.***
3. Do we need to quote a UPS for our server and network switch? Or will this be provided?
 - ***Do not include the cost of a UPS as part of the core project. You may submit the UPS cost as an option for consideration***
 - ***Do include the expected load in VA-H or KWH what will need to be on UPS power.***
4. What are the locations of the IDF's and other rooms containing network equipment?
 - ***This information is not readily available, but you are welcome to visit the site***
5. These cameras will have to span across several buildings, is there piping between these buildings to support network cabling
 - ***Assume that you will provide and install all necessary conduits.***
